LS503 Manually Levelled Rotating Laser

Are you sick and tired of trying to find levels, datums and heights on your job site using a spirit level or string line and finding that it never quite comes together easily or quickly. Have you found yourself saying "I wish I had a laser level," but you could never justify the price for a tool you will only use once or twice a month. Well look no further. The LS503 is what you need.

This very economical laser, lets you complete most of your leveling and aligning tasks quickly and accurately and without having to spend a fortune.

Set the unit up on a tripod (included in kit), turn it on and you are ready to work. The LS503 establishes a level laser reference over your entire job site for a multitude of construction, DIY and alignment applications, all completed accurately and with a minimum of fuss.

Ideal for general building, carpentry, floor or wall tile installation, verandah or deck construction, fencing, landscaping and all of those DIY projects.

Economise without compromise with the LS503 manually leveled 360° rotating visible laser level. This unit sets new standards in visible rotating lasers for affordability, productivity and ease of use.

At last, an accurate, quality laser level is available, without having to break the bank.
